ABOUT TTFC

DSIR and NRDC have jointly set up a Technology Trade Facilitation Centre (TTFC) at NRDC Head Quarter premises in New Delhi to facilitate export of technology intensive products, services and projects.

Objective to set up TTFC were as follows:

- To display exportable products/ technologies/ projects & services through blowups/ catalogues / techno economic literature, etc
- To arrange visits of foreign delegations and business associations
- To provide assistance in technology commercialization, patent search & filing, etc.
- To follow up visitors enquiries and provide feedback to exhibitors

The following facilities were offered to the participants:

- Highly subsidized exhibition space for display of exhibits
- Rate: Rs. 200 per sq. mtrs
Booth size: 6/ 9/ 12 sq. mtrs.
Period: 3/ 6/ 9/ 11 months
- Publicity in leading newspapers / journals
- Common Facilities like Phone, Fax, Photocopier, conference Room

Eligibility criterion for participation was as follows:

- A company manufacturing a hi-tech product / equipment / machinery which is being exported or has export potential
- A company willing to license / transfer a proven technology in India or abroad
- An organization offering a complete technology

The companies having DSIR recognized in-house R&D units; registered / empanelled with DCSSI / NSIC or any other government agency; executing a government funded R&D / technology development project to be encourage for participation. Besides, NRDC licences and R & D / Technology Award winners were also invited to participate in TTFC.

1. A B R ORGANICS LIMITED

Company Background and Operations

A B R Organics Limited was founded in 1991 by scientists formerly employed at Indian Space Research Organization (ISRO). With the license from ISRO and financial assistance from Industrial Development Bank of India, the company started manufacturing polyimide resins at Hyderabad. The core competence of the company is Research & Development, wherein a team consisting of highly qualified chemists, engineers and technologists are always at work constantly to develop newer grades of polyimides and their applications. The fact that ABRON polymers have been accepted for critical space, aerospace and defense applications, itself speaks of the high quality standards being maintained in the factory.

Department of Scientific and Industrial Research, Government of India, has recognised the R & D efforts of the company in the field of polyimides and phenolic resins. Efforts in R & D have culminated in developing many grades of polyimide resins, monomers, reactive diluents and special grades phenolic resin. The company also undertakes contract research at its R & D Center.

Products/ Services

- Various grades of polyimide resins used as moulding powder, film, varnishes etc. used for aero space, electrical applications
- Contract research for development of specialty polymers & Chemicals as per customers requirements, especially in the field of polyimides
- Contract manufacture of fine chemicals in low volumes

2. ATOMIC VACUUM COMPANY

Company Background and Operations

The company is proprietary concern and engaged in manufacture of high vacuum equipments and project based on it. It is pioneer in manufacture of high vacuum distillation equipments. Atomic Vacuum Company (Exports) is in manufacturing business since last 16 years. Its main manufacturing facility is at an industrial area near Mumbai (Bombay).

The company is in the export business since last 7 years and goods have been exported to Oman, Kuwait, UAE, Singapore, Thailand, Chile.

Products/ Services

- Neem based Pesticide (Both Technical & Formulation) for 100% export
- Natural Vitamin E
- Used oil Re-refining (as per CPCB-Delhi guidelines, using Thin Film Evaporation)
- Neem based Pesticide Project
- Extraction & purification of Vitamin E, Vit., A from natural sources.
- Technology for the extraction & purification of herbal products
- High vacuum Molecular (Short path) Distillation plants, Driers, High vacuum pumps and Molecular Distilled Oils for pumps

Annual Turnover

Year	2004-05	2005-06	2006-07
Value (Rs. In Lacs)	275	327	398

3. CORAL INDUSTRIES

Company Background and Operations

Coral, an ISO 9001-2000 company having a state-of-the-art manufacturing facility in Bahadurgarh, Haryana. It manufactures exquisite yet affordable range of products targeted at the lower-middle class segment. It is a professionally managed multi-product company with a glorious track record of over decades. Coral became a pioneer in both domestic and international markets in the field of chemicals, wall textures and a varied range of exclusive products in a short time. With Continuous research and development, keeping in view the ever changing needs of the consumers, it has perfected the science and art to develop high performance construction chemicals, ceramic items and paints.

Since a decade, Coral Industries has been a progressive leader in the field of ceramic, textures and industrial coatings, earning a reputation for quality, service and dependability.

To rationalize process and to optimize operation during the last decade more and more automation has been developed in order to improve the quality of products and to fulfill future demand for best quality products. Coral is the first company to introduce latest Japanese Fiber base textures in India.

Products/ Services

- Water proofing products
- Wall textures
- Wall paints & putties
- Flooring products
- Industrial coating
- Construction chemical products
- Ceiling boards
- Decorative mica tiles
- Metallic paints
- Fluorescent paints.

4. FEROLITE JOINTINGS LTD.

Company Background and Operations

Ferolite Jointings Limited is India's No. 1 manufacturing unit of CAF. This recognition was achieved in a short span of time. Ferolite, a technology driven company, manufactures wide range of products suitable for a number of general and specialized applications and has been catering to the diversified needs of core sector industries, such as Engineering, Mining, Aerospace, Steel, Chemical, Petrochemical, Fertilizer, Power Generation, Ship building, Atomic Energy, Electrical, Oil Exploration, Automotive, Railways, etc.

Ferolite products are manufactured on the latest machines developed with the aid of research, applied science, specialized technical knowledge and innovative skilled experienced technocrats, with firm belief in 'Investment for the future' by continuously upgrading R&D facility. The company has exported its product to UAE, Singapore, Spain, Thailand, USA, UK, Israel, Egypt, Netherlands and Kuwait.

Products/ Services

- Non asbestos sheets
- Asbestos jointing sheets
- CAF jointing sheets
- Asbestos textiles & packings
- Non asbestos braided packings

Annual Turnover

Year	2004-05	2005-06	2006-07

5. FORTUNE CARE PVT. LTD.

Company Background and Operations

Fortune care is a well known for doing quality work fast and within the time. It has developed and manufacturing Pyramid brand rust converter to save the m.s. steel from corrosion. Fortune care Pyramid rust converter is a fast drying material. It is water based too. First coat is converting the adherent rust to the metal complex due to chemical bonding. The material is in buff color. It is converted in black color & the second coat is a preventer. This is a single pack system and is acrylic polymer base. The drying period is 30 to 60 minutes. It can be coated by Epoxy red oxide, black bitumen or any other oil based paints. Fortune care pyramid rust converter is non-toxic, non hazardous, non inflammable and the film is fire-retardant. The shelf-life is two years. Resistance to acid and alkalis is in moderate concentrations.

Fortune care rust converter is passed 500 salt spray hours. It is tested for dry and wet cycles for consisting any looses of bond or scaling by Maharashtra Engineering Research Institute, Government of Maharashtra.

It is tested as per IS: 13515:1992. It is recommended for radial gates, thrash racks, & penstocks (inside out side). The product is being used by ports & docks, shipping industry, automobiles industry, locomotive & railways, bridges & dams, offshore oil & natural gas installations, building construction, industrial fabrication, etc.

Products/ Services

Rust converter:

- Marine grade
- Industrial grade

Method of applying Rust converter-First coat marine grade pyramid rust converter after cleaning by sand blasting:- Colour shade after application of rust converter (wide angle view) (1)

6. KISHORE & COMPANY

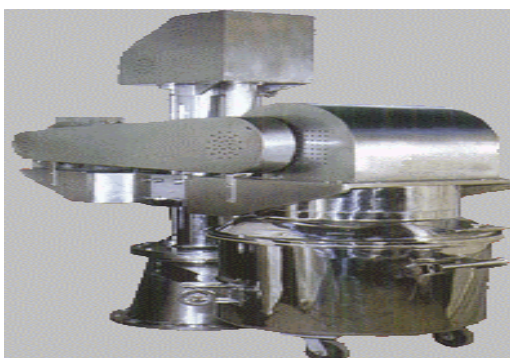

Company Background and Operations

Kishore & Company was established in 1983 to produce standard quality pharmaceutical machinery of all sections. Later on it went in to the production of food processing & chemical machineries. The factory complex is equipped with latest tools and technical knowhow in machinery and engineers. It has supplied complete plant machinery /turnkey projects in pharmaceutical and food processing to Kenya, South East Asia, Indian sub-continent and certain East African countries.

Products/ Services

- **Pharmaceutical machinery**

- Automatic Capsule Loader
- Capsule Filling Machine
- Powder Filling Machine
- Planetary Mixer
- Tube Filling & Sealing Machine
- Automatic 6 Head ROPP
- Capsealing Machine
- Automatic 6 Head Liquid Filling Machine
- Automatic Labeling Machine
- Automatic Rotary Bottle
- Washing Machine
- Colloid Mill
- Filter Press
- Semiautomatic Liquid Filling Machine

- **Food processing machinery**

7. MADHU SILICA PVT. LTD

Company Background and Operations

Madhu Silica is a private limited partnership company and is engaged in the manufacture of various range of Precipitated Silica. It produces of various grades of spray dried /flash dried silica. The company was the pioneer in manufacturing precipitated silicas in India since 1978. It has an independent In-House DSIR recognized R&D Centre. It manufactures more than 40 different grades of Precipitated Silica for usage in end application of various industries such as tyre /rubber/ footwear / mix rubber applications, oral/health care/cosmetics/ pharma applications, food/feed applications and speciality applications. It has been approved by the Unilever group for supply of Dental Grade silicas to Asia Pacific & North African countries – a laudable achievement of getting approval as the only company other than INEOS, UK . It exports 1500 MT precipitated silica per annum to Unilever – Indonesia, Vietnam, Egypt and Saudi Arabia. Other customers overseas are located at Nepal, Sri Lanka, Bangladesh, Myanmar, Tanzania, Turkey, Spain, and UK..

The Company is ISO 9001(2000), ISO 14001(2004), FAMI-QS, FDA Certified and on the path of attaining GMP, ISO-22000 and REACH.

Products/ Services

- Tooth paste grade silicas
- Rubber grade silicas
- Pharma grade silica

8. MECPRO HEAVY ENGINEERING LTD

Company Background and Operations

MECPRO is manufacture & supplier of processing equipments, plant & machinery for the oils & fats industry. It has been active in the construction of large oils and fats plants in India and abroad in terms of design, engineering, manufacturing and trial operations. Such activities have contributed to the all round reputation that it has acquired over the years, demonstrating advanced technology and quality workmanship.

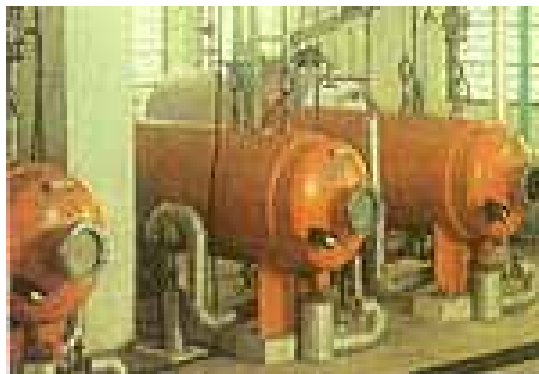

Its R&D center is recognised by DSIR, Government of India and has developed optimal treatment systems tailored to the individual characteristics of the oilseed to be processed. The company has introduced solvent recovery from vent air and azeotropic hexane distillation by reflux column first time in the world. It has also modified the design of trouble free bulk conveyor and enhanced bleachability of oil as compared to similar plants of other makes.

It is capable to offer 25% reduction in any solvent extraction plant in the world. The filtration pattern introduced by the company is so efficient that it is in position to make a guarantee of sediments below 0.05% giving a crystal clear appearance to the product. This gives maximum return to the processor as the maximum product value along with the big savings in routine maintenance expenditure.

Products/ Services

Turnkey project for :

- Solvent Extraction
- Vegetable oil refining
- Vanaspati Ghee
- Fat splitting & stearic acid
- Industrial hard oil
- Soaps & detergents

9. NATIONAL SUPER TECH COMPOSITES

Company Background and Operations

National Super Tech Composites has developed normal cure composite tape seal (NCCS) for cable joint. It is a new product for telecom cable wire joint enclosure. This ambient cure technology will replace heat shrinkable technology existing in cable industry for telecommunication (copper/paper core) cables. The new product developed is leak proof and termite proof and also cheaper than the existing product available in the market. It has bagged the NRDC invention award for the development of NCCS in 2004.

The company is working mainly towards the invention and commercialization of substitute product for the imports and other innovative products, which find wide application in the area of public.

It is a proprietary concern and established in 2004 with the motive of manufacturing and supplying the inventive product NCCS (Normal Cure Composites Seal) to various telecom, companies such as BSNL, MTNL, Bharti Infotel etc.

The cable seal product was scientifically developed and time tested under various soil conditions in Karnataka and accepted for the usage.

Products/ Services

- Normal cure composite tape seal (NCCS) for cable joint

Annual Turnover

10. NISARGA BIOTECH PVT. LTD.

Company Background and Operations

Nisarga Biotech is a private limited company and has achieved a pioneering status in successful development of totally indigenous technology of super critical extraction. It is the first Indian company who has developed this technology totally indigenously and the products (natural extracts, herbal extracts etc.) manufactured at their plant have been recognized at international level. Today the company has to its credit not only the super critical fluid extraction (SCFE) plant design and manufacturing capability but also a unique experience of running and operating SCFE plant for more than 10000 hrs. This experience and the process know-how generated have hoped the SCFE plant technology at Nisarga Biotech resulting into a state of the art SCFE technology in the world. It has exported Super Critical Extracted oils and extracts to USA, Agriculture inputs to Greece, Spain and France.

Products/ Services

- Super Critical extracted essential oils, herbal extracts
- Spice oils and extracts Black Pepper Oil, Cardamom Oil, Cinnamon Bark oil, Clove Bud Oil, Coriander seed oil, Cumin seed oil, Ginger oil, Nutmeg oil
- Perfumery : Ambrette seed oil, Sandalwood oil, Patchouli oil, Bakul Extract, Champaka Extract, Davana Cyperus Root Oil
- Herbal products : Indian Valerian oil, Neem Leaf Extract, Spikenard oil Extract, Turmeric Extract Oil
- Super Critical Extraction plant and technology for extraction

11. PLUSS POLYMERS PVT. LTD.

Company Background and Operations

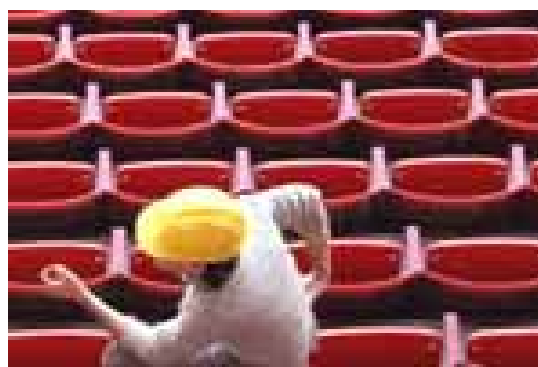

Pluss Polymers Pvt Ltd is an offshoot of Manas, established to develop and market new technologies and products developed in house. Pluss Polymers was incorporated in 1993 to commercialise the technology for grafted modified polymers, alloys and blends. Backed by competent technical staff, laboratory facilities with a retrievable wealth of information marketed the **OPTIM®** brand of grafted polymers for the first time in India in 1996. OPTIM® coupling agents and compatibilisers allow plastics manufacturers of world-class quality products to optimize their compound properties. The ADNYL® range of nylon alloys provide the user with extra tough nylon for increased strength. Profiles and other rigid and flexible containers for thermal energy storage have also been introduced in India for the first time by Pluss Polymers.

Spurred by the urge to develop new products and applications based on common plastics materials and innovative use of various additives available, the company has developed a number of new technologies indigenously. These include processes for mixed film laminate recycling, cross linked polyethylene foams, grafted modified polymers, polymers for alloys and blends, wood-plastics composites, and synthetic paper compounds suitable for film making.

The company received NRDC Intention Award in 2003 for the development of Maleic Anhydride Grafted Polymers for the first time in India.

Products/ Services

- Grafted Polymers
- Nylon Alloys
- Synthetic Paper Compound
- Phase Change Materials
- High MFI Polypropylene

Annual Turnover

12. POLYFAB FOAMS (INDIA) PVT. LTD.

Company Background and Operations

Polyfab Foams (India) Pvt. Ltd. is the manufacturer of expanded polystyrene (EPS) and polyethylene foam packaging. The company has developed a low cost technology for cutting and 3-dimensional contouring of EPS and it is using it themselves very successfully in the manufacture of packaging buffers, boxes, trays, supports, & fillers; evaporative patterns for foundry; prototypes; models. Polyfab process is unique, because no mould, die or costly tooling is required; intricate shapes can be produced; the setting up time for individual jobs is short; no quantity constraint exists; minimum lead times as no moulds are required; design changes can be incorporated easily at any stage.

Products/ Services

- Complete technical know-how
- Equipment
- Training
- Follow up-/ trouble shooting, guidance
- Advice in marketing, economic viability and other related matters.

13. SS FOUNDRY CHEMICAL INDUSTRY PVT. LTD.

Company Background and Operations

S.S. Foundry is an ISO- 9001:2001 certified company engaged in the manufacture and supply of plants and equipments for industrial gases, chemical and allied products. It is in the line of industrial gases since a very long time. It is a leading manufacturer of industrial gases and gas plants. It has got its gas plants in several locations in India. At Delhi unit, CO₂ gas plants, liquid storage tanks and lorry tankers of various sizes are fabricated. It is exporting its products mainly to Middle East, South East Asian, African, CIS and other neighboring countries.

Products/ Services

Plant for the production of :

- Carbon dioxide Gas
- Anesthetic Gas
- Hydrogen gas
- Silicates
- Detergent
- Toilet & washing soaps
- Menthol & Mentha oil
- Hydrated lime
- Zinc/Calcium chloride
- Mg/Iron sulphate

Storage Tanks and lorry tankers

14. SSP PVT. LTD.

Company Background and Operations

Established in 1977, SSP Pvt. Ltd. popularly known as SSP has commendable achievements in field of design, manufacture, installation & commissioning of dairy, food-processing, pharmaceutical and chemical plants & equipments. It has developed indigenous and highly cost effective projects and equipments for small and medium scale sector.

It is pouring its best in research, production and quality control to expand its wings into vast Indian and overseas market. It is engaged in the development of latest models of energy efficient processing equipment to obtain rich herbal extracts for various applications. It has exported number of plants to USA, Vietnam, Canada, Qatar, Russia, Pakistan, Uzbekistan, Bangladesh, Cyprus, Uganda, Tanzania, Jordan, Saudi Arabia, Mexico, Myanmar, Nigeria and Iran.

Products/ Services

- Industrial Evaporators.
- Industrial Dryers

Turnkey Projects

- Dairy (Milk & Milk Products)
- Fruits & Vegetable Processing Plant (Tomato, Mango, Apple, Orange etc.)
- Food Processing Plants (honey, Instant Tea, Instant Coffee, Herbal Extraction, Egg Powder)
- Chemical Plants (Salt, Dyes, H-Acid, Penicillin, Bulk Drug and Molasses based distilleries).
- Effluent Treatment plant

15. SUMAN SYNDETS PVT. LTD.

Company Background and Operations

Suman Syndets Pvt. Ltd. is executing turn key chemical projects and is specialized in exclusive designing, developing, manufacturing, marketing and servicing plant and machinery for manufacture of soaps, detergents, oils mills and edible oil refinery, cocoa processing. It was incorporated in 1992 and now has become a leader in the field of exports of process equipment, machinery and projects for soaps, detergents, cosmetics, edible oils and chemicals. It has exported plant and machineries to several African countries.

Products/ Services

- **Soap Plant** – For manufacture of Laundry Soaps, Toilet Soaps, Liquid Soaps, Saponification Plant, Vacuum Drying Plant.
- **Detergent Plant** - Acid Slurry Plants, Liquid Detergent Plant, Detergent Powder Plant, Detergent Cake Plant.
- **Edible Oil Plant** – Oil Mill Machinery, Oil Refining Plant, Oil Fractionation Plant, Vanaspati/Oil Hydrogenation Plant, Margarine plant, Solvent Extraction Plant
- **Cocoa Processing** - Cocoa Liquor Plant, Cocoa Powder Plant, Cocoa Butter Plant.
- **Chemical Plants** – for Sodium Silicate, Sulphuric Acid, Single Super Phosphate, Aluminum Sulphate,
- **Palm Oil Mill** – Palm Oil Extraction Plant, Palm Oil Physical Refining Plant, Palm Oil Fractionation Plant.
- **Mini Sugar Plant**

16. WELLPACK ENTERPRISES

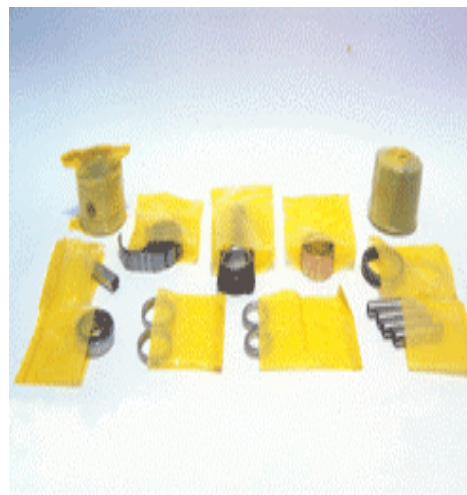

Company Background and Operations

Wellpack Enterprises was established in 1968 with the need to cater to quality supply of packaging material in the Indian market. In 1989, it pioneered the concept of corrosion prevention, using eco-friendly and pollution free vapour corrosion inhibitors (VCI) which is today impregnated in polymer films. Caprust corrosion retardant bags were introduced in the year 1989 by the company. Backed by indigenous technology, it provides an alternative solution to grease, oil, butter paper, red oxide and others. It provides customized solutions and services for the protection of ferrous and non-ferrous metals as per the needs of the client.

It is the policy of Wellpack to provide the products and services at a standard which meets the needs and expectations of the customers, comply with agreed specifications for quality, and meets relevant legal and regulatory requirements. The products have been tested and certified by CPRI and Indian Institute of packaging.

Products/ Services

- White bin liners
- Black & colour refuse sacks
- Compactor sacks
- Clear/transparent PE bags
- Ziplock bags
- LDPE/HDPE films
- Corrosion retardant bags
- Turnkey packaging projects

17. BITTOO ENTERPRISES

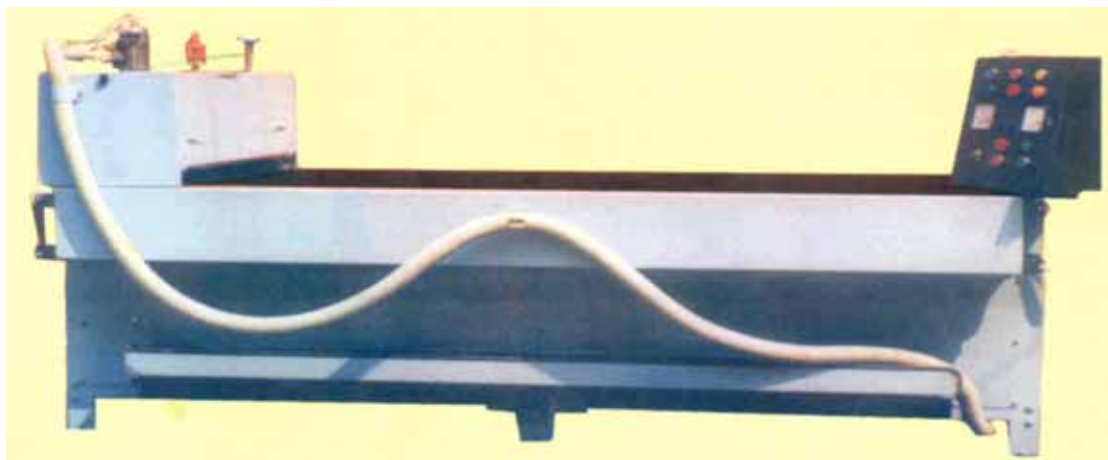

Company Background and Operations

It is a proprietorship firm. The proprietor of the company has developed a multipurpose design-cutting machine capable of cutting, embossing and calendaring with precision quality and speed. The machine developed is a revolution in cutting technology and latest and most advanced technological replacement of conventional system. The proprietor received NRDC invention award for the development of this machine in 2004.

Products/ Services

Multipurpose design cutting machine use in the following industries:

- Leather
- Readymade Garments
- Shoe
- Sports goods
- Paper
- Automobile
- Decoration items
- Disposable Crockery / Food Packaging Material & Tin Box Toy

25. OK-eM GROUP

Company Background and Operations

Ok-em Group deals with melting of ferrous and non-ferrous metal. Through 31 years of experience and continuous effort towards perfection, it has achieved expertise in this field. It can perfectly model any single piece metal weighing up to 500 Kgs perfectly. A new technology developed by the company after continuous efforts and trials enables it to manufacture on a commercial level and also facilitates it to take up production of small quantities of a given specification. The new technology of exothermic melting has several advantage such as Savings on electricity (about 80%) ; saving in capital investment (about 65%) ; flexibility in batch melting ; maintenance of costly and sophisticated equipment eliminated; metal gets refined automatically; incase of temperature loss, it can be improved by adding exothermic mixture in the pouring ladle itself; time required for each batch melting is 45 minutes only; very simple process and can be handled by semi skilled workmen. This process has been tested and practiced for over several years and has been systematically streamlined for industrial application. The process is now available for commercial production of steel castings.

Products/ Services

- Cast Iron & Alloy Cast Iron
- Steel and Alloy steel
- High manganese steel
- Aluminum Based alloy
- Copper Based Alloy
- Ornamental Castings
- Industrial Castings
- Technology for melting of Iron & Steel by exothermic reaction

27. SHARPENN TECHNOLOGIES PVT. LTD.

Company Background and Operations

Sharpenn Technologies Pvt. Ltd. manufactures and export wide range of industrial dryer & filter such as carbon filter, sulfur filter, drum dryer etc. With state-of-the-art infrastructure and dedicated professionals, it is poised to deliver products in conformation with the international standards. Its workforce is composed of highly qualified technocrats and quality control experts.

The R&D unit of the company is working towards reducing the production cost; manpower involvement, consumption of filter media, no spoilage of product, reduce down time, higher flow rates and safe and friendly operations.

Products/ Services

- Pharmaceutical Filters
- Micro Bag Filter
- Vertical Leaf Filter
- Horizontal Leaf Filter
- Self Cleaning Filter
- High Speed Centrifuge
- RVDF, Drum Dryer, Flakers
- Effluent treatment plants
- Continuous edible oil refineries
- Continuous distillation plants
- Oil mills

28. SUPREME MOULDS & MACHINERY

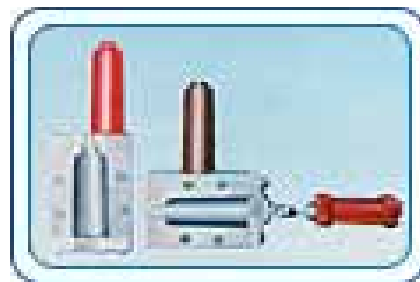

Company Background and Operations

For nearly three decades, Supreme Moulds have been making high quality moulds and plastic processing machineries in India.

Specially designed moulds provide with a competitive edge along with a highly skilled manpower, dedicated to satisfy most stringent demands. It manufactures the highest performing blow moulds to meet the exact tolerance for all types of containers, bottles & jars. Diamond Polishing for mirror-effect is provided for the most simple to the most complex items in P.V.C. In addition to engineering & unique design capabilities, product development through Sparking Erosion Technology is also being carried out. The company has developed in mould bottom deflashing & neck deflashing in process for automatic machine. An efficient cooling circuit, the heart of a mould, allows the blow molding processor to obtain a high output from the moulds.

Products/ Services

- Blow Molding Machines
- Hydraulic Operated Machines
- Vertical Moulding Machine
- Horizontal Injection Moulding Machine
- Pet Blow Moulding Machine
- Precision moulds
- Book Binding Machine

29. TECHNOLOGY AND ACTION FOR RURAL DEVELOPMENT (TARA)

Company Background and Operations

The mission of the TARA is to promote sustainable national development. The corporate strategy is to innovation, through design, development and dissemination of technologies. To be able to provide such responses successfully, the TARA has built up a strong capacity to identify the priority issues confronting the nation and devise effective ways to solve them. It has therefore brought together a cadre of professional staff members with a wide range of skills and backgrounds but a common, solid commitment to excellence and teamwork. For over twenty years, the TARA has been transforming the landscape of rural India by creating new opportunities to build village economies. TARA is a social enterprise, which pioneers business approaches by which local entrepreneurs can help improve rural lives.

TARA provides customized technologies tailor made for local application to create jobs and opportunities, particularly for women.

Products/ Services

- TARA Micro Concrete Roofing Tile Technology
- TARA BALRAM Compressed Earth Block Technology
- TARA Concrete Block Technology
- TARA Fly Ash Technology
- TARA Eco-Kiln
- TARA Handlooms
- TARA Handmade Paper and Paper Recycling Technology
- TARA Briquetters

30. ADVANCED BIOTECH RESEARCH PROJECTS

Company Background and Operations

Advanced Biotech Research Projects is one of the renowned Biotech Researchers Groups in India for the past 12 years exploring the areas of Agri-biotech, livestock therapeutics & nutrition and human pharmaceutical formulations. It is recognized, as world leaders with its unique agri-biotech invention WIN-A-CROP 100% Organic Plant Nutri-Supplement, formulated to exceptionally increase the agriculture productivity & soil fertility in an exceedingly cost-effective, eco/farmer-friendly and globally preferred Organic means. Mere supplementation of WIN-A-CROP formulation by foliar spray or soil application increases the farm-productivity of all crops up to 300% by quantity and quality, surpassing the entire prevalent tech-intensive / capital-intensive agri-productive technologies. Facilities for manufacturing and global marketing of WIN-a-CROP are developed by its subsidiary WIN-A-CROP Projects.

Products/ Services

- 100% Organic Plant Nutri-Supplement “WIN-A-CROP agricultural input”
- Contract research in the areas of agriculture, livestock therapeutics & nutrition & human pharmaceutical formulations and offers futuristic solutions and preferential technologies based formulations
- Technology Transfers & Licensing
